

Solid Fuels to Hydrogen Initiative RFP QUESTIONS

Q1: I have had the chance to review the recently issued RFP for the Solid Fuels to Hydrogen Initiative and had a question on *Section 3.A*. In that section, it states that “\$1,000,000 has been set aside for funding this initiative.” Is the \$1,000,000 reference the maximum amount that can be awarded to selected proposals, or is that the dollars allocated to fund the RFP process and evaluation? I am assuming that the \$1,000,000 is the total to be awarded to one or more proposals but I wanted to clarify in case my understanding was incorrect?

A1: *The \$1m is the total budget for the entire RFP.*

Q2: Does the proposal have to go all the way from feedstock to Hydrogen? or can it just be a part of the process.?

A2: *It is difficult to provide a definitive answer without having context. Preference would be for the proposal to go all the way to Hydrogen. However, a proposal that only considers part of the process would still be considered compliant.*

Q3: Have you (the WEA) previously had discussions with potential applicants, so there is already an identified potential?

A: *No.*
